

Year 2 Summer A Maths Plan Mrs Waters' Class

Week		Focus
Week 1		Multiplication - Counting in 2s, 3s, 5s, 10s, making sets of numbers and learning the multiplication and division facts. The children will use their knowledge of multiplication and division to solve word problems.
Week 2		Quarters of shapes and numbers- We will explore how to find and recognise quarters of shapes understanding that a shape must be divided into 4 equal parts. We will find quarter of sets of numbers by sharing equally into 4 sets or by halving and halving again. We will find quarters of numbers in word problems and in various creative contexts.
Week 3	Times tables will be a recurring theme	Place value- The children will consolidate their understanding of how to partition 2 digit numbers recognising the tens and ones. Addition and Subtraction: The children will consolidate their understanding of addition and subtraction and use a range of strategies taught this year to solve problems and challenges.
Week 4		Revision of key targets and Assessments
Week 5		Revision of key targets and Assessments

Maths topics may vary from the plan outlined above, depending on the learning needs of the children at the time.
