

## Year 2 Summer A Maths Plan

Week		Focus
Week 1 and 2	Times tables will be a recurring theme	<b>Addition</b> The children will consolidate the addition strategies taught this year to develop fluency and to solve a range of challenges and investigations. They will use place value to add teen numbers and then other 2 digit numbers including missing number calculations. <b>Shape:</b> We will revise 2 and 3D shapes and their properties
Week 3		<b>Quarters of shapes and numbers-</b> We will explore how to find and recognise quarters of shapes understanding that a shape must be divided into 4 equal parts. We will find quarter of sets of numbers by sharing equally into 4 sets or by halving and halving again. We will find quarters of numbers in word problems and in various creative contexts.
Week 4		<b>Subtraction:</b> We will consolidate the subtraction of ten and multiples of ten from 2 digit numbers using a range of place value resources. We will subtract a single digit from a 2 digit number bridging the ten number.
Week 5		National statutory Maths Assessments
Week 6		National statutory Maths Assessments

Maths topics may vary from the plan outlined above, depending on the learning needs of the children at the time.
